

OEXA 82-0150/14
24 June 1982

MEMORANDUM FOR: Director of Central Intelligence

VIA: Deputy Director of Central Intelligence

FROM: Director, Office of External Affairs

SUBJECT: Status of Rosenthal Request for Declassification of Agency Documents

1. In response to the exchange of notes between yourself and Chairman Benjamin Rosenthal (D., NY) on 17 and 25 May respectively, his staff has provided us with summaries of substantial portions of the 17 CIA documents. Their intention is to make the summaries a part of their public record on OPEC spending in the U.S.

2. A review by the interested DDO and DDI offices reveals that the so-called summaries actually include 50% of the original text. They are a combination of misleading comments with the lead in "...the CIA says...", and include material already known to be sensitive. Consequently, we will prepare our own clean summaries of each document for Subcommittee consideration. [redacted] D/OGI/DDI, will conduct a final review of this material in coordination with interested Agency components. The package should reach you by 28 June. In the meantime, we will stay in contact with Chairman Rosenthal's staff.
